Please find below and/or attached an Office communication concerning this application or proceeding.

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Application/Control Number: 10/785,341 Page 2

Art Unit: 3682

DETAILED ACTION

Drawings

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Application/Control Number: 10/785,341

Art Unit: 3682

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Marx et al (US 6,640,831).

Marx et al disclose a check valve comprising: a) a substantially cylindrical body (3) having a first aperture at one end and a second aperture at an opposite end (see Fig 1), the first aperture of the cylindrical body for connecting to a pressurized fluid source and a third aperture (9) which allows pressurized fluid to flow out (see Fig 1); b) a first ball seated (5) in the first aperture and a second ball (7) seated in the second aperture; c) a spring (6) located between the first ball and the second ball, biasing the first ball to seat and block fluid from returning from the hydraulic chain tensioner to the pressurized fluid source (see Fig 1).

Re claim 2, the second ball has a larger diameter than the first ball (see Fig 1).

Re claim 3, wherein the second ball is locked into place in the second aperture of the cylindrical body by interference (col. 3 lines 45-66).

Re claim 4, the second ball is press-inserted into a seat formed in the inside surface of the side wall of the substantially cylindrical body (col. 3 lines 45-66).

Re claim 5, the second ball is locked into place in the substantially cylindrical body by folding the edges of the substantially cylindrical body over the second ball (see Fig 1).

Re claim 6, the substantially cylindrical body comprises a sidewall and a cylindrical base wherein the first ball is housed (see Fig 1).

Application/Control Number: 10/785,341

Art Unit: 3682

Re claim 7, the sidewall of the substantially cylindrical body is a continuous wall, and the third aperture comprises a hole in the continuous wall (see Fig 1).

Re claim 8, the sidewall of the substantially cylindrical body is comprised of a plurality of sectors evenly distributed along the base and the third aperture is space between sectors (see Fig 1a).

Re claim 9, the first ball and the second ball are made of ball-bearing steel (well known).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vicky A. Johnson whose telephone number is (571) 272-7106. The examiner can normally be reached on Monday-Friday (7:00a-3:30p).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on (571) 272-6217. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
